- Pentana Audit & Risk Software – **Reseller Partner for Nigeria and West Africa**

### ***Mission Statement***

To ensure that businesses achieve their full potential by providing top-notch solutions to meet their varying needs. We recognize that our clients have different needs and we have positioned ourselves to meet all these diverse needs, hence the question is not “what do we do?” but rather “what don’t we do?”

### ***Vision Statement***

To be at the forefront in Information Technology, Finance and Management Consulting in Africa through the use technology as a major tool in transforming business activities In Africa and adding values to our stakeholders in the process

### **Our Core Values:**

# OUR SERVICES

## Oracle Implementation

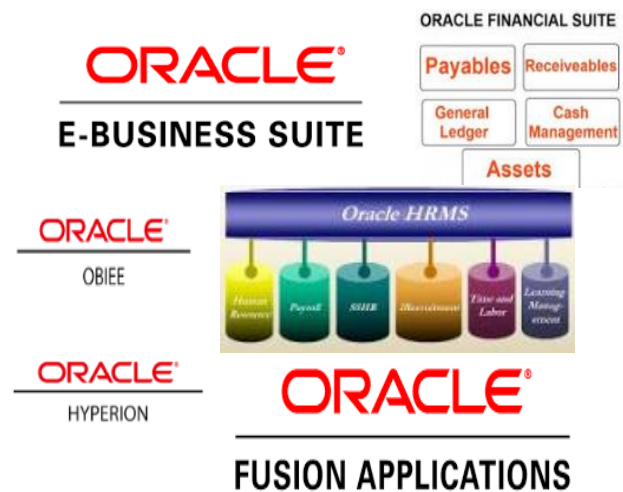

**Enterprise resource planning (ERP)** solutions integrate key business and management processes, providing a high-level view to an organization's business. ERP integrates fragmented business operations, often replacing multiplicity of legacy systems in the process. The ERP opportunity for an organization lies in a fundamental change in business operations focused on the guts of an enterprise: channel management, supply chain optimization, demand forecasting and other operations that can maximize customer service levels, minimize inventory levels and control other costs.

These guts applications can be dramatically changed by examining overall business processes, rethinking organizational authority and responsibilities, and selecting and implementing appropriate ERP applications to focus on these areas. CHC is an **Oracle Gold Partner** with the ability, skills and experience to deliver implementation, development and support Oracle projects on time and within budget.

ERP is a business-critical issue for many companies. Getting it right is fundamental to their ongoing success and profitability. Getting it wrong has far-reaching implications. Getting it wrong means missed due dates, cost overrun, and/or reduced scope or specifications. But among the failures are some cases of stopping implementations or complete abandonment of implementations. At CHC, we recognise that every project is different and requires a variety of dedicated skills and support. Our industry expertise cuts across all sectors of the economy. We help clients build, integrate and support mission-critical systems for real-time enterprises. We also implement custom developed applications.

Counterhouse is a leader in Oracle deployment with **lots of FIRSTS** to its Credit and these include:

- ❑ First Nigerian Partner to implement the following:
  - First Oracle ERP Cloud project in Oil & Gas Industry in Sub-Saharan Africa
  - First Strategic Cloud project in West Africa. This is a complete Oracle Cloud story across the different platforms: Oracle SaaS and PaaS integrated with Oracle Payroll hosted on Oracle IaaS.

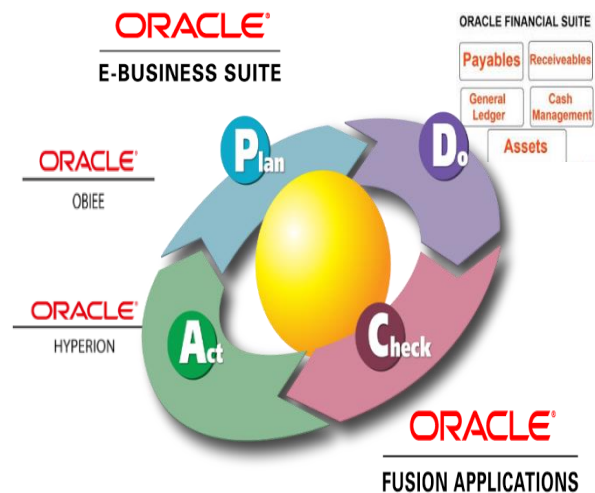

- First Integration Cloud Service project in Nigeria.
- First Oracle Infrastructure as a Service project in Nigeria
- ❑ First and only partner with the shortest delivery period in Oracle project implementation in Nigeria.
- ❑ The first and only Oracle partner in Nigeria that specialises in Oracle Training, Oracle Implementation, Oracle Quality Assurance and Oracle Transformation.

**Our capabilities include:**

- Functional and technical knowledge of leading ERP Applications and especially in the following Oracle E-Business Suite and Fusion Applications:
  - Oracle Financials
  - Oracle Human Capital Management (HCM)
  - Oracle Supply Chain Management (SCM)
  - Oracle Procure to Pay (P2P)
  - Oracle Hyperion Planning & Budgeting
  - Oracle Business Intelligence
  - Oracle Governance, Risk and Compliance (GRC)
- Expertise in all types of projects (Implementations, Upgrades, Customizations, Integrations)
- Project Managers with 10+ years’ experience in managing IT projects and with full-lifecycle ERP implementations in multifaceted engagements and complex environments
- Consultants with rich functional experience with one or more ERP implementations
- Proven implementation, customization, interfacing, migration and integration methodology
- Vertical industry specific services
- Industry-wide reputation for cost-effective and high-quality Production support and Maintenance.

## Oracle Quality Assurance

“Quality assurance” is an integrated system of management Quality assurance, or QA for short, is also known as ‘peer review’, ‘quality improvement’, ‘quality activities’ and ‘quality studies. It is the process of verifying or determining whether products or services meet or exceed customer expectations. Activities involve planning, implementation, documentation, and assessment, reporting and quality improvement to ensure that a process, product or service meets defined

standards of quality. It deals with the entire process and not just the end product.

Quality assurance is a process driven approach with specific steps to help define and attain goals. In a project, QA ensures that service delivery by the implementation firm is:

- Fit for purpose or in line with contractual agreement;
- Right first time (mistakes should be eliminated); and
- Gives you value for money i.e. justifies your investment.
- Complies with the best practice and international standards

Studies in the last few years reveal that Organizations now engage the services of Independent **Quality Assurance** to advise whether a service delivery is fit for purpose, in line with contractual terms, gives value for money and complies with the best practice and international standards. A project can be considered successful if it meets the needs and expectations of the user community and stakeholders.

However, to get the best value out of the investments on the project, Independent QA have experience and would have gone through the “learning curve” and a lot of lessons learned on similar projects.

This will significantly reduce the time spent on the project, cost as well as enhance the scope. Independent QA can also help our client’s team think outside the box- a difficult skill to cultivate when her team is busy with day-to-day operations. Counterhouse is familiar with all the critical points which ultimately results in successful projects and we can visualize the big picture and how the project, problems and team fit into it. In specific terms.

**CHC as a QA Consultant will provide the following on any project**

- Drafting the Terms of Reference (TOR) and Request for Proposal (RFP) for the prospective contractors
- Coordinate the selection of successful firms for the implementation of the various components of the project
- Promoting quality achievement and performance improvement throughout the contract period;
- Setting QA compliance objectives and ensuring that targets are achieved;
- Assessing contractor’s deliverables and comparing with contractual agreement;
- Ensuring compliance with national and international standards and legislation as well as best practice;
- Setting up and maintaining controls and documentation procedures;
- Collating and analysing performance data and charts against defined parameters;

## CHC as a QA Consultant will provide the following on any project

- Liaising with contractors and ensuring the execution of corrective action when necessary and compliance with contractual agreements;
- Establishing standards of service for contractors in conjunction with client's stakeholders;
- Monitoring performance by gathering relevant data and producing periodic reports.

## Oracle Training

Enterprise Resource Planning (ERP) holds a promising future in terms of employment and training. The professionals are second to none in terms of demand which will continue to outstrip supply. Many thanks to the intuition of companies that have made them realize the importance of ERP. The researches conducted by the leading IT consultants have also drawn positive conclusions. They point a vibrant and an ever-expanding growth for ERP given the increasing tendency of companies to mechanize and automate enterprise operations.

ERP has been the preferred and still continues to be favourite choices among other applications. At CHC, our partnership with **Oracle University** gives us the leverage to offer both **Oracle Functional and Technical Training for End Users, Super Users and Implementation Consultants** to meet the ever-increasing demand for these resources. Our training curriculum focuses on how to setup, implement, administer, customize and extend ERP applications.

## CHC as an Oracle University Trainer provides the following Training:

- Oracle Applications (**both on EBS and Fusion**) – **Financials (General Ledger, Receivables, Payables, Fixed Asset and Cash Management), Supply Chain Management (Purchasing & Inventory), Oracle Hyperion Planning & Budgeting and Oracle BI – Business Intelligence for Reporting.**
- Oracle Technology and Database
- Custom Training – Enterprise Deployments, Disaster Recovery Planning, Migrations & Apps Development
- Oracle System Administrator and lot more

CHC as an Oracle University Trainer provides the following Training:

**Our Training highlights/facilities includes:**

- Well-designed curriculum
- Teaching by professionals with implementation and training experience around the globe
- Small batch for better one on one interaction
- Flexible timings for working people
- Real time projects with practical case studies from the industry

## ePrentise Oracle Transformation

**ePrentise**® software allows any change in Oracle E-Business Suite, whether it is consolidating multiple EBS instances or changing configurations, cleansing data, or creating subsets of data. The user defines the target data structure (i.e. a new instance, a new organization unit, a new calendar, a new flexfield, etc.) ePrentise software analyzes the difference between the source and target and automatically generates code to copy, filter, change, and merge the source data into the target structure. An underlying ePrentise engine (Metadata Analysis) analyzes the data structures, relationships, and other database objects. Once the Metadata Analysis is complete, rule templates are used to generate the code required to copy, filter, change, or merge the source data to the desired target data structure. In the process, the source and target may be compared, standards may be applied, duplicates identified and resolved, and differences in business processes reconciled.

The image displays the ePrentise logo and tagline: "Accelerating the time for change in E-Business Suite". Below this, four software capabilities are listed in colored boxes:

- Divestiture Software**: Create 2 separate EBS instances while retaining all key information assets of each.
- Consolidation Software**: Merge 2 or more database instances & maintain data integrity and history.
- Reorganization Software**: Make major configuration changes to reflect your business structure & operations.
- FlexField Software**: Easily change your accounting flexfields as often as your business changes.

To the right of these boxes is a red circle with a diagonal slash over the word "REIMPLEMENTMENT", indicating that reimplementation is not required when using ePrentise.

**ePrentise** provides software that accelerates business change by providing the ability to change any data in order to align with new business initiatives across the enterprise. At the metadata, data, and business process levels, ePrentise software identifies gaps between a source and a

target. Whether the entities are charts of accounts, calendars, legal entities, business groups, other operating units, or entire EBS instances, eprentise determines the gaps between the source and the target through its proprietary mining process and then automatically generates the code to resolve the differences by adding or changing database objects, reconciling duplicates, changing configuration data (flexfields, organization units, product IDs, etc.), standardizing using a built-in rules-based knowledge repository, or filtering data based on any number of criteria. Because the software understands the data relationships, changes are permeated throughout the database. Companies do not have to do a time-consuming, resource-intensive reimplementaion to accommodate business changes like mergers, acquisitions, or divestitures to adapt to new technologies (such as subledger accounting or Multi Org Access Control), or to change EBS setups that the company has outgrown. eprentise software enables changes to take place in months with very few technical resources.

#### Benefits:

- Increased efficiency reducing project timelines, costs, and improving accuracy of outcomes.
- Rules-based system with comprehensive knowledge repository.
- Operational efficiencies.

## Ideagen Pentana System

Ideagen Pentana System is an integrated software suite designed to help Governance, Risk Management and Compliance (GRC) professionals – **Internal Auditors, External Auditors, Inspectors, Compliance Officers and Risk Managers** – manage a wide range of audit, investigation, risk and compliance and other GRC operations from planning through to fieldwork, review, report generation and follow-up. It delivers timely, relevant, cost-effective risk, audit management, and compliance information that help to safeguard organization’s reputation. Around the world successful GRC professionals in all industries and audit regulatory authorities rely on the Ideagen Pentana System to deliver results in their day-to-day activities such as: performing risk assessments, managing audits, assuring full compliance and tracking issues.

Ideagen Pentana System delivers real-time reporting across all business lines with a clear and concise picture of the issues at hand thus saving money and time. It makes it easy to enforce a consistent methodology to facilitate review and interpretation of results and providing simultaneous access to all audit work for lead auditor review and manager approval without the need for document transfer. Ideagen Pentana System offers a modern and simple user interface and yet it is extraordinarily powerful.

## School Management Software

Our School Management Solution is an Educational ERP developed to cater for the needs of educational institutions. It helps schools in streamlining all departments, functions and processes. which leads to better transparency, productivity and control. It is a School Management Solution designed as a one-stop solution to the various challenges of managing any academic institution. The system covers complete student life cycle from Admission to Graduation and Alumni along with administrative processes like HR, Inventory etc.

### **Our School Management Solution has the following modules:**

- Pre-Admission Management
- Student Information System
- Multi Institute (Multi Campus) Definition
- Course and Attendance Record management
- Fees Management
- Human Resources Management
- Library and Hostel Management
- Examination and Certificate/Document Management
- Alumni Records Management
- Automatic and Programmed Reports and many more.

### **Its benefits include but not limited to:**

- Substantial savings in manpower, time and financial outlay.
- Improved quality of interaction amongst students/teachers/school/parents/centers/sub units
- Efficient workflow with faster information, reduced errors and minimal duplication of work
- Automatic generation of reports on all aspects of school administration.
- Web based and comparatively affordable – you do not need servers, 24-hour electricity etc.
- Improved Transparency, Productivity and Control

## ICT Training

The IT field is getting more and more crowded and competitive each year. Yesterday's skills don't quite cut it in today's advancing technological world; only continuous training is essential to catch up with it. The world of IT training also is becoming ever more crowded, with book and CD based training, IT training boot camps, live IT training and many other choices. It is important for every worker, IT professional and every enterprise manager, to carefully evaluate these IT training options in order to get the best possible value.

At CHC, we recognize these facts which explain why we always strive to meet, and exceed, the expectations of our students and clients. We also recognize that superior instructors are more than just skilled technologists and that the cornerstone for success of a quality accelerated technology training provider is the instructor's ability to translate complex technical theories into understandable concepts and applied knowledge.

Our instructors are cross-certified industry professionals who have delivered quality training around the globe. In addition, they deliver the curriculum, provide leadership, and coach students to ensure successful information comprehension and retention as well as certification where applicable. Instructors provide group instruction and individual assistance with a keen ability to cater to every aptitude and background.

**Our IT Training Courses include the following:**

### **ERP Training**

- Oracle Database
- Oracle Application (EBS and Fusion)
- Oracle System Administrator

### **IT Certification Training Courses**

- Certified Information System Auditor (CISA)
- Certified Information System Manager (CISM)
- Certified in the Governance of Enterprise Information Technology (CGEIT)
- Project Management Institute's (PMI) Project Management Professional (PMP)

### **Custom Training**

- IT Security Training

## Our IT Training Courses include the following:

- Enterprise Deployment
- Disaster Recovery Planning
- Proprietary Applications
- System Infrastructure Software
- Application Development
- Enterprise migration
- Industry Application Training (CRM; ERP)

### Train-the-Trainer

## Outsourcing

Organizations face a complex technology environment and the need for specialist skills comes at a cost. Outsourcing is defined as allocating a role or activities to a third party unrelated to the organization. The most common motive for organizations choosing to outsource core and specialist functions is to reap reduced operational costs, alleviate administrative burdens and focus on strategic areas. According to *The Outsourcing Institute*, the top ten reasons why companies outsource are:

1. Reduce and control operating costs.
2. Improve company focus.
3. Gain access to world class capabilities.
4. Free internal resources for other purposes.
5. Gain access to resources that are not available internally.
6. Accelerate re-engineering benefits.
7. Handle functions that are difficult to manage or are out of control.
8. Make capital funds available.
9. Share risks.
10. Bring in a cash infusion.

However, experience has shown that this benefit may not be as advantageous in practice as it sounds in a proposal. At CHC we offer clients a Managed Outsource model that provides the following additional benefits:

- Dedicated but flexible resource
- Collaborative approach
- A breadth of specialists rarely available in an in-house function
- Cost effective services able to cope with changing risks
- Following best practice using current methodologies, tools and intellectual capital
- Knowledge transfer, management control, efficiencies and improvements

We deliver fully outsourced services, providing all aspects of normal in-house functions as follows:

- **System Management**
- **Accounting Bureau Services**

## IT Infrastructure

IT infrastructure is the starting point for every company that decides to invest in Information and Communication Technology. Infrastructure plays a critical role in business transformation. It enables everything else: applications, processes, operating models, enterprises and extended enterprises. It usually starts very small with a few unlinked computers. The growth of an IT infrastructure encompasses networking, multiple geographic locations, tens and hundreds of servers and thousands of computers that need to work together and remain manageable.

At CHC, we provide our clients with access to an advanced, resilient, and secure IT infrastructure. Our integrated global approach provides benefits of cost-effective solutions by leveraging skills, processes and technology as well as better levels of service with a flexible, yet robust delivery model. Our infrastructure services include the following:

- **Networking & Communication**
- **Connectivity**
- **Security and Surveillance**

## Advisory Services

At CHC, we have advisory professionals with unparalleled financial and accounting expertise, knowledge of business processes, industry insight and technology, and customer relationship skills. Through our capabilities in these areas, we assist clients in translating strategy into action.

Particular emphasis is placed on the client priorities of performance improvement in all areas of operation. Whether you are pursuing new opportunities; dealing with a serious event; or managing the daily pressures of growth, competition and shareholder value, we're here to help.

Our advisory specialists connect with one another and with you to help your business move from strategy to implementation and focus on results. Specifically, we can help with the following:

- **Business Process Re-engineering**
- **Strategic Business Planning**
- **Project Management**
- **Change Management**
- **Business Continuity Planning**
- **IT Policy**
- **Risk Management**
- **Vendor/Systems Selection**

## Corporate Finance

Whether you want to sell your business, expand your operations, buy the business you currently manage, or if you are considering floating your company, we can help you to maximize the value you generate from your transaction. We will help you to identify your strategic options, assist in the execution and post transaction integration and help you to avoid costly pitfalls and delays.

We will give you the right balance of technical expertise, market insight and practical experience that will give you the best chance of completing the deal successfully.

### Our Corporate Finance Services include:

- **Due Diligence**
- **Feasibility Studies**
- **Financial Modelling**
- **Valuation**
- **Mergers & Acquisition**
- **Management Buy-Outs and Management Buy-Ins**
- **Post Deal Support**

## Audit and Assurance

Auditing & Assurance Services are at the core of any Financial Management setup. It ensures proper working of the organization according to laid down internal controls, regulatory requirements and also the efficiency and effectiveness of the controls itself. At CHC, we offer a complete range of Assurance Solutions to help improve your financial efficiency, accuracy and stability as well as your corporate governance.

### Our range OF Business Assurance Solutions includes:

- IT and IS Audit
- IT Assurance
- IT Security Assessment
- Financial Audit
- Internal Audit
- Tax Services

## Consulting

In modern human resource management practice, it is increasingly being acknowledged that the workforce constitutes a vital and valuable organizational asset. Realizing tangible performance benefits from an organization's human assets requires effective recruitment, retention and workforce development strategies. At CHC, we provide companies with a range of human resource services designed to align people assets with business goals thereby increasing the effectiveness of the organization. We aim to help our clients solve human resource challenges and overcome any obstacles.

We support our clients in upgrading the capabilities of the people within the organization and we work with the executives to identify the current hidden talent within and outside the

organization. We ensure your team is the "RIGHT TEAM". Our HR team is composed of experienced trainers, managers, search and selection specialists and administrators. Our Consulting Services include:

- **Strategy/General Management Consulting**
- **Human Resource Consulting:**
- **Oracle ERP Consulting**
  - *Executive Search and Recruitment*
  - *Compensation Surveys, Pay Comparison Services and Performance Appraisal*
  - *Organizational Planning & Analysis and Organizational Structure Design Services*
- **IT Consulting**
- **Audit and Tax Consulting**

## OUR PEOPLE

Counterhouse Consultants gives clients access to seasoned professionals with extensive experience in their chosen fields. We combine the strengths of global reach and local relationships to deliver solutions to our clients' operational needs. We operate with a unified management team, talent pool, knowledge, and resources, as well as a single set of tools, methodologies, and training to deliver consistent services to our clients. - Monitoring and optimizing database performance
- Backup and Recovery of Databases
- Monitor table space fragmentation
- Monitor disk I/O across databases
- Project Management
- Oracle XML DB
- Undertake problem resolution and troubleshooting
- Undertake Performance Tuning of Instances
- Inspect Indexes to identify potential candidates for re-building
- Undertake database sizing, define and implement the back-up and Recovery Strategy
- Monitor day-to-day databases activities using OEM and other monitoring Tools
- Manage and assist users with database access/connectivity, ODBC, and SQL\*Net.
- Writing and installing scripts for database administration tasks, such as backups and capacity monitoring
- Monitor table and table space growth to prevent space allocation becoming a critical issue
- Gather data requirements to define, allocate, and compute growth needed for total storage

### **Omotayo OWOLABI (M.Sc. in view), H.N.D., B.Sc., OCS**

A graduate of Banking and Finance with (Distinction) from the Federal Polytechnic Ilaro. He also holds a Bachelor Degree in (Accounting) from Southwestern University. A prize winner including the overall best graduating student of his alma mater, Tayo is very versatile in all areas of our operation including Consulting, Pentana, e-Prentise, School Management Solution, Oracle implementation, Training and Quality Assurance. An Oracle Functional consultant with Technical background on SQL Foundation and Oracle Database (11g and 12c) his Oracle implementation experience spanned both private and public sector engaging in interfacing with clients on all major key activities including requirement definitions, evaluation, configuration as well as conducting key and end user training on Oracle applications for both Oracle EBS – E-Business Suite and Fusion.

Tayo has always played pivotal role in most of our projects and assignments on Oracle Application, ERP Quality Assurance, Operation Research, Business Plan, Feasibility Studies and Pentana Audit Management Software from planning through completion to “go-live” stage.

Tayo is an Oracle E-Business Suite Certified Specialist and Oracle Support Specialist.

### **Mayowa ADELUSI B.Sc., OCS, CISA, CISM, MNCS**

Mayowa has a bachelor’s degree in Computer Science with Economics from Lead City University, Ibadan. He acquired immense years of experience in IT support help desk before joining Counterhouse Consultants Limited as a Techno-Functional consultant. He has gained vast experience in Consulting, Information Technology, Oracle Enterprise Applications, IT Security & Audit, and Cloud Technologies.

Mayowa has certifications from Oracle Corporation and Information System Audit and Control (ISACA). He has also attended several workshops on Oracle Fusion application and Oracle EBusiness Suite (EBS), as well as tools and applications such as ePrentise and Excel4Apps that enrich the users’ experience with Oracle Applications. As a core technical person, he is well adapted to using several tools for the administration, monitoring and optimization of databases and applications. He is also acquainted with the best practices in IT service management. He handled the HCM module in the first Oracle Fusion Application implementation in Nigeria and has also been involved in several Oracle EBS projects. He is also involved in end user training on Oracle Application as well as IS audits.

**They are supported by other eminently qualified professionals.**
